

Master SAFe® at ease in a practical context.

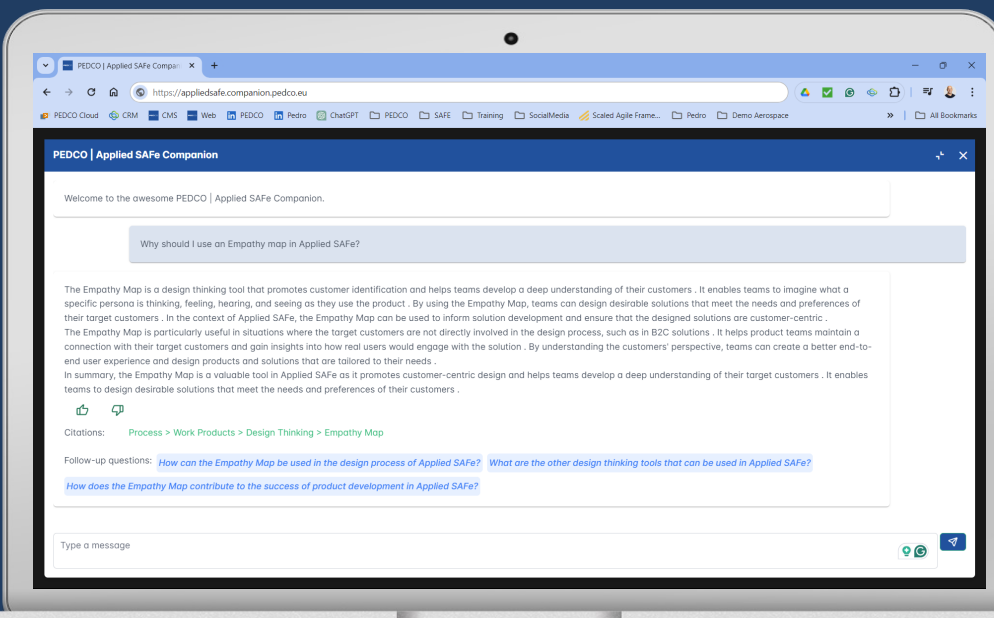

# Applied SAFe® Companion

**WE BELIEVE THAT EDUCATION THRIVES IN CONVERSATION, AND OUR APPLIED SAFe COMPANION IS HER TO BRING THAT CONVERSATION TO YOU!**

This cutting-edge AI tool enhances your learning and understanding of Applied SAFe, acting as a knowledgeable companion throughout your journey.

The Applied SAFe Companion is uniquely trained on the extensive content of Applied SAFe, equipped to answer your queries with precision and prompt engaging follow-up questions to deepen your comprehension. Its intelligent design allows for a dynamic and interactive learning experience, akin to having a personal companion passionate about facilitating your mastery of Applied SAFe. When the discussion delves into highly specific areas, the companion seamlessly integrates direct links to Applied SAFe content, ensuring you have immediate access to the most relevant information.

Our aim with this Companion is to create a lively and informative dialogue around Applied SAFe, simulating an environment where learning is both engaging and enjoyable.

# PEDCO

## Applied SAFe®

**Available today!**

- ✓ The Applied SAFe Companion is an add-on product to Applied SAFe.
- ✓ All Applied SAFe customers get initial access to the Companion with 1000 free questions.
- ✓ There are no setup costs for Applied SAFe Customers, pricing is based on a monthly subscription model.
- ✓ Backlinks to Applied SAFe are to the standard PEDCO version.
- ✓ Talk to us about integrating your existing adaption of Applied SAFe.
- ✓ The companion may also be purchased as a 'stand-alone' product without Applied SAFe and trained for your existing Quality Management System (QMS) e.g. Stages, Confluence, and more.

## Main Features

The Applied SAFe Companion offers several key features to enhance the learning and implementation of the Scaled Agile Framework (SAFe) within the Applied SAFe platform:

- **Personalized Learning Experience:** The Companion provides a personalized and interactive guided learning journey tailored to each user's needs, language and pace. It provides targeted support to ensure a comprehensive understanding.
- **Adaptive Guidance:** The Companion uses AI technology to understand and respond to user queries. It offers adaptive guidance, contextual follow-up questions, and direct access to relevant Applied SAFe content, helping users navigate complex concepts and find the information they need.
- **24/7 Availability:** The Companion is available around the clock, allowing users to access help, coaching, and support at any time. This particularly benefits users in different time zones or those with tight schedules.
- **Seamless Integration:** The Companion seamlessly integrates with the Applied SAFe platform, providing direct links to processes, guidelines, and best practices. This integration facilitates a smoother learning experience and encourages the practical application of SAFe concepts in real-world scenarios.
- **Practical Application Support:** Besides theoretical learning, the Companion assists users in applying SAFe concepts in practical scenarios. It offers guidance directly linked to the Applied SAFe platform's content, enabling users to implement SAFe practices effectively.

## Benefits

### Improved QMS

Leveraging insights from common queries, our tool swiftly identifies and addresses QMS gaps, speeding up a boosting system adoption.

### Accelerated Learning

### Instant Responses

Users spend less time searching for information and more time on value-adding activities. Less coaches are needed.

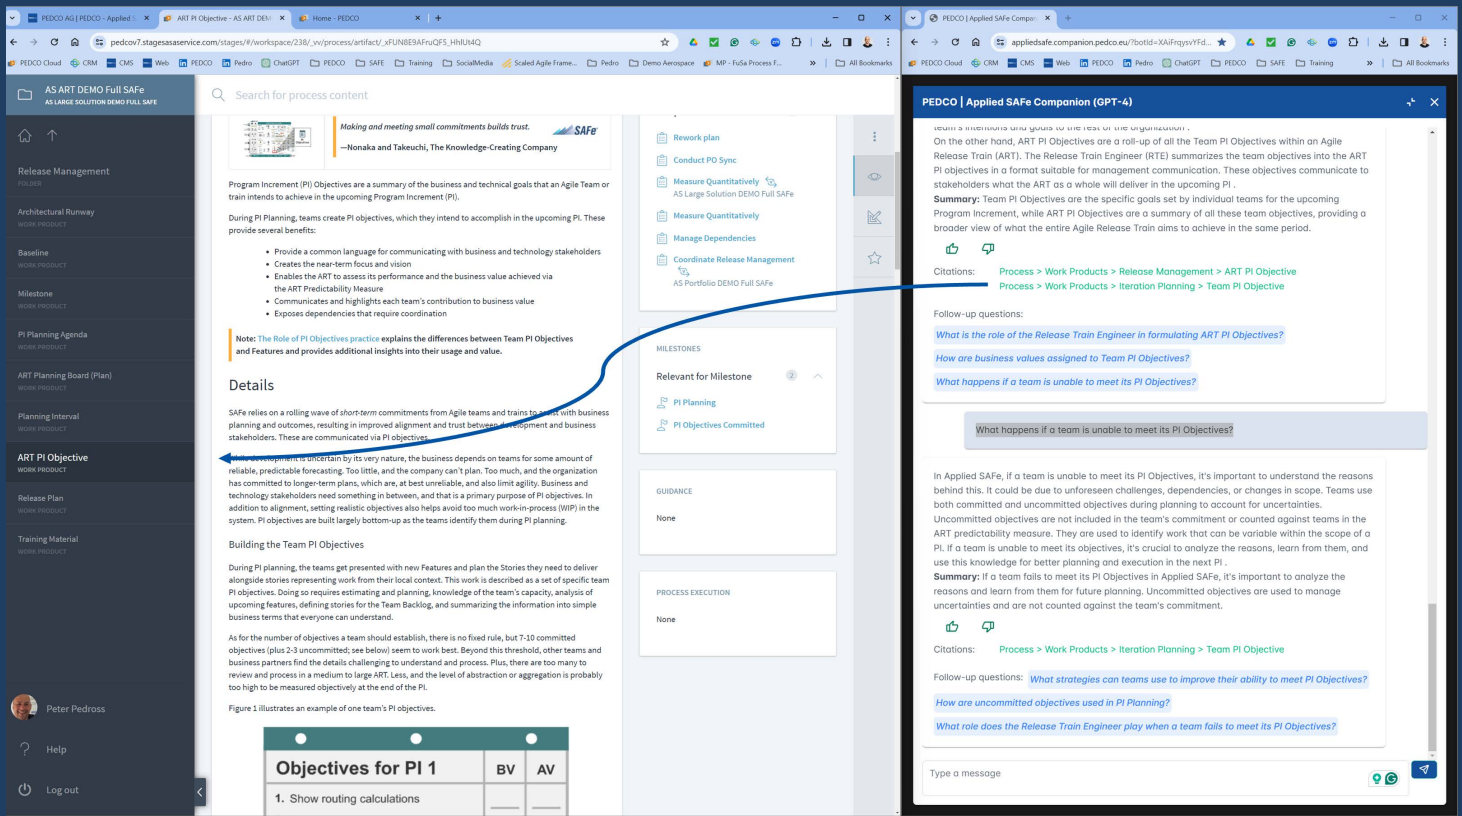

### Increased Productivity and Saved Cost

**Technology and functionality:** The Applied SAFe Companion is a sophisticated AI-powered chat bot designed to enhance learning and implementation of the Scaled Agile Framework (SAFe) on the Applied SAFe platform. The Companion uses OpenAI's GPT technology to understand and respond to user queries, providing adaptive guidance, contextual follow-up questions, and direct links to relevant Applied SAFe content, ensuring a comprehensive understanding of SAFe application. Both newcomers to agile methodologies and seasoned professionals looking to deepen their SAFe expertise can benefit from using the Applied SAFe Companion. The Companion is available 24/7, providing immediate answers and guidance anytime, which is invaluable for users across different time zones or those working on tight schedules.

The Applied SAFe Companion **seamlessly integrates** with the Applied SAFe platform by providing direct links to process content, guidelines, and examples within Applied SAFe, facilitating quick access to the precise information needed. By providing immediate, targeted support and fostering a deeper understanding of SAFe, the Companion helps teams to implement effectively agile practices, thereby improving coordination, efficiency, and overall performance in SAFe endeavors.

### Architecture: Three deployment options to suit your individual needs

#### Fully hosted deployment:

This option provides a fully managed solution where all components — the Content & Vector Database, Orchestrator, LLM (OpenAI), and Frontend — are hosted on secure cloud infrastructure provided by our partners Microsoft and Google. Ideal for businesses looking for a hassle-free turnkey solution that minimizes internal IT overhead.

#### Hybrid deployment:

This flexible deployment model hosts the Vector Database, Orchestrator, and Frontend at the customer's data centre, with the LLM (OpenAI) powered by our cloud partners. It's a balanced solution for businesses that require both control and cloud-powered intelligence.

#### On-premise deployment:

Tailored for organizations with the highest standards for data security and residency, this option locates all components — Vector Database, Orchestrator, your existing LLM, and Frontend — within the customer's data centre.
