

Applied SAFe®, PEDCO's Navigation System for Scaled Agility.

Applied SAFe® 5.0 - FACT SHEET

WE SOLVE YOUR COMPLIANCE CHALLENGES!

Building cyber-physical and high assurance systems is a complex task and is becoming increasingly software reliant, there is a growing demand for best practices to address conceptual and process incompatibilities between systems and software. Applied SAFe® bridges that gap, and does so in a modular, scalable, and adaptable way.

Use the power and capability to support the growth of your process – from teams to enterprise – simple to complex – Applied SAFe® has the tools, options, and support to achieve the enterprise goals and outcomes all while staying compliant with the organizations internal, external, and regulated requirements.

Applied SAFe 5.0 Haleakala Version

What is Applied SAFe®?

Applied SAFe® is a fully fledged ALM tool agnostic implementation of the Scaled Agile Framework® (SAFe®) as a process model. It serves as your own customizable instance of SAFe®.

Applied SAFe® includes all roles, processes, activities, artifacts, practices, templates, guidelines, milestones and phases as defined by the SAFe® methodology in order to bring the framework to life; including metrics and tailoring.

Key Features of Applied SAFe®

- Built on SAFe® 5.0 as the 'de facto' Standard for Scaled Agility
- Comprehensive customizable Process Model
- All process elements are customizable with built in tailoring
- Independent instantiations on all SAFe® Levels
- Run multiple concurrent Process Variations
- Guided tours for all the new core competencies as well as for the Applied SAFe® Product and Navigation.
- Extend, adapt and integrate with your own process assets
- Upward compatible and elaborated in sync with future versions of SAFe®
- Available as managed SaaS or on a private Cloud Server
- Includes Compliance Mechanisms for Regulated Environments
- Includes licensed SAFe® Content and Templates
- Includes agile quality processes for mature organizations
- Integrated CMS with Work Product - file, review, and state management
- Combines Compliance and Efficiency to scale Agility to Enterprise Level

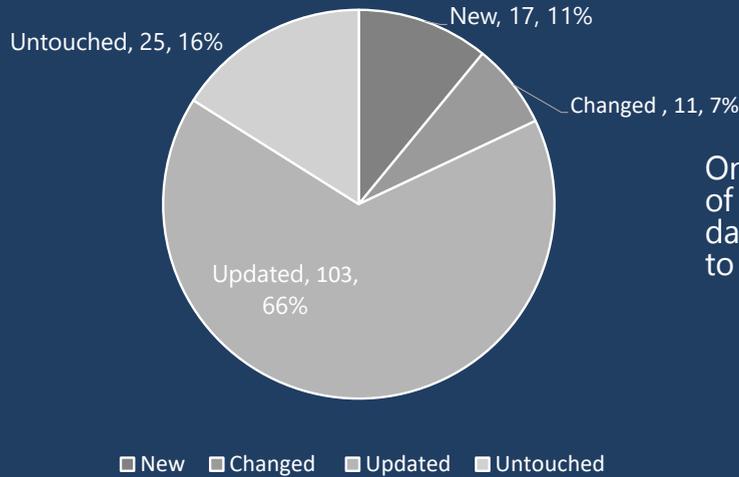

Applied SAFe 5.0 Introduces:

- Implementations of Guided Tours open new perspectives on the Scaled Agile Framework for:
 - Business Agility

Total 156 SAFe Content pages, where as

On the left you can see the percentages of content that has been changed/updated/untouched or new from SAFe 4.6 to 5.0

Below you will see the percentage of content and processes that changed with each version upgrade of SAFe.

"This collaboration demonstrates our commitment to exploring new entry points and approaches to adopt the Scaled Agile Framework," said Dean Leffingwell, Chief Methodologist and creator of the Scaled Agile Framework. *"We are pleased to be working with such outstanding innovators as PEDCO's Peter Pedross and his team. The potential to help ease the way for fully comprehensive SAFe® adoption is enormous."*

Dean Leffingwell,
Scaled Agile Inc.

"Implementing scaled agile organizations in regulated environment always means to define and to track agile processes. Applied SAFe® is a very valuable tool for an agile transition project in such an environment. You need less time and less investment in work to be able to implement a complete agile standard process."

Dr. Thorsten Janning,
KEGON AG
SPCT & SAFe® Fellow

"With PEDCO and SAI we have found exactly the right collaboration partners. The excellent process expertise of the PEDCO team combined with SAI's market leading Scaled Agile Framework® gives our customers a way of integrating agile practices into their current process landscape and become more efficient without having to start from scratch."

Dr. Erich Meier,
Method Park, CTO
