BRINGING LEAN-AGILE ORGANIZATIONS TO LIFE!

Applied SAFe is an interactive Lean QMS of how to achieve business agility in a regulatory-compliant way. Facilitated by customizable and tailorable descriptions with clearly defined roles, their interaction, and supporting artifacts, it enables a clear and common understanding for all participants.

With Applied SAFe you can approach your transformation towards SAFe in a structured and deliberate manner and ensure that it is successful and sustainable in the long run. Almost ready-made and officially approved by Scaled Agile.

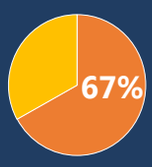
Applied SAFe® works for those organizations who are in highly complex, highly compliant and auditable organizations which depend on a defined and common understanding of SAFe to reduce waste and maximize efficiency, all while being agile AND regulatory compliant.

- Are you ready to build solutions and compliance incrementally?
- Are you looking to scale agility within your organization?
- Do you need to organize for value and compliance?
- Do you want to ensure, that your staff is aligned on a common understanding of SAFe in your organization?

If you answered yes to one or more of these questions then:

Applied SAFe® is for you!

Interested to see more? Get in contact with us or book a personal meeting at www.appliedSAFe.com

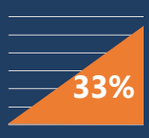


Less discussion time on how to interpret SAFe®

Solid comprehensive implementation of SAFe® as each version is approved by its inventors

Years reduced cost of delay

Prove Compliance with minimal effort for reference models such as: A-SPICE, FDA IEC 62304, ISO 26262, ISO 13485, ...



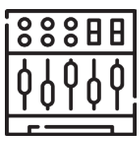
Faster process improvement with built-in organizational learning

> 520

Built-in configuration and tailoring options

PROVEN BENEFITS

Master Complexity



> 500 Built-in tailoring options to tailor the framework

Establish compliance to ASPICE, FDA FAA, IEC62304, and more!

Accelerate Transformation

67% less discussion time needed to interpret SAFe®

2/3 reduced ramp up time for new hires

Learn and Improve Relentlessly

Establish a Learning Organization

> 2 years reduced cost of delay, reuse instead of reinventing the wheel
